Reminders

There are a few things we require of our pet parents in order to ensure all of our visiting furry friends are as safe as possible while under our care:

- *Ensure all vaccinations are current, including a Bordetella vaccine for your dog to protect against canine kennel cough*
- *Your pet should be free of internal and external parasites; any pets found to have parasites will be treated at the owner's expense to limit any possibility of transmission to our other guests*
- *Inform our staff if your pet has any special needs such as current medications, allergies or health conditions*

Comforts from Home

Below is a list of things our pet parents can have ready to bring for their furry friend during their stay at the Markham Veterinary clinic:

- ✓ *In most cases it is better to bring your pet's own food to avoid any possible digestive upset during their stay (if you choose, we provide a premium pet food for their stay)*
- ✓ *Blankets may be brought from home as long as they are machine washable*
- ✓ *Toys may be brought from home as long as they can be cleaned and sanitized or are machine washable*
- ✓ *Special treats may be brought from home*
- ✓ *Please bring any medications or supplements that your pet will need during their stay*
